1. CHT Patients and Payments Worksheet
  - Distributed to insurers on June 26 and to CHTs on June 30.
  - First CHT payments based on insurer patient attributions and market share. For most HSA's funding stayed roughly given the adjustment factor. For those that didn't, there were other factors that resulted in a reduction in payments with the new attribution model
2. Monthly Change Reports (Rosters) and NCQA Score Reports
  - Distributed on July 6.
  - Medicaid (alone) paying PCMHs \$3.00 PPPM, effective July 1, 2015.

On January 1<sup>st</sup> Rosters will be synchronized when all insurers will be paying the \$3.00 PPPM rate. In addition there are performance measures for a total of .50 that is based on both quality and utilization performance components.
3. Medicaid PCMH PPPM overpayments for June 2015- In addition to the normal PCMH payments, Medicaid included an additional \$3.00 PPPM June will result in an over payment of almost double of what was received. A message went out to practices and project managers. Medicaid will be recouping the overpayment and practices are encouraged to review their remittance reports closely. It is not clear when and how they will process the recoupment but the safest assumption might be that it will happen in the normal way recoupments are processed. Tim will communicate any updates he receives from Medicaid.
