- Patient flows and increasing demand for services
- CCG landscape is covered by two Local Authorities, that differ significantly - **but we've accommodated it**

- Political change - but we've achieved cross party support
- GP views and clinical leadership - **we've harnessed those and they've driven this agenda**
- External input has been minimal - **we've kept a low profile**

**This was challenging, but it is the right thing to do for our city. We never take our eyes off that goal.**

# Four Strategies

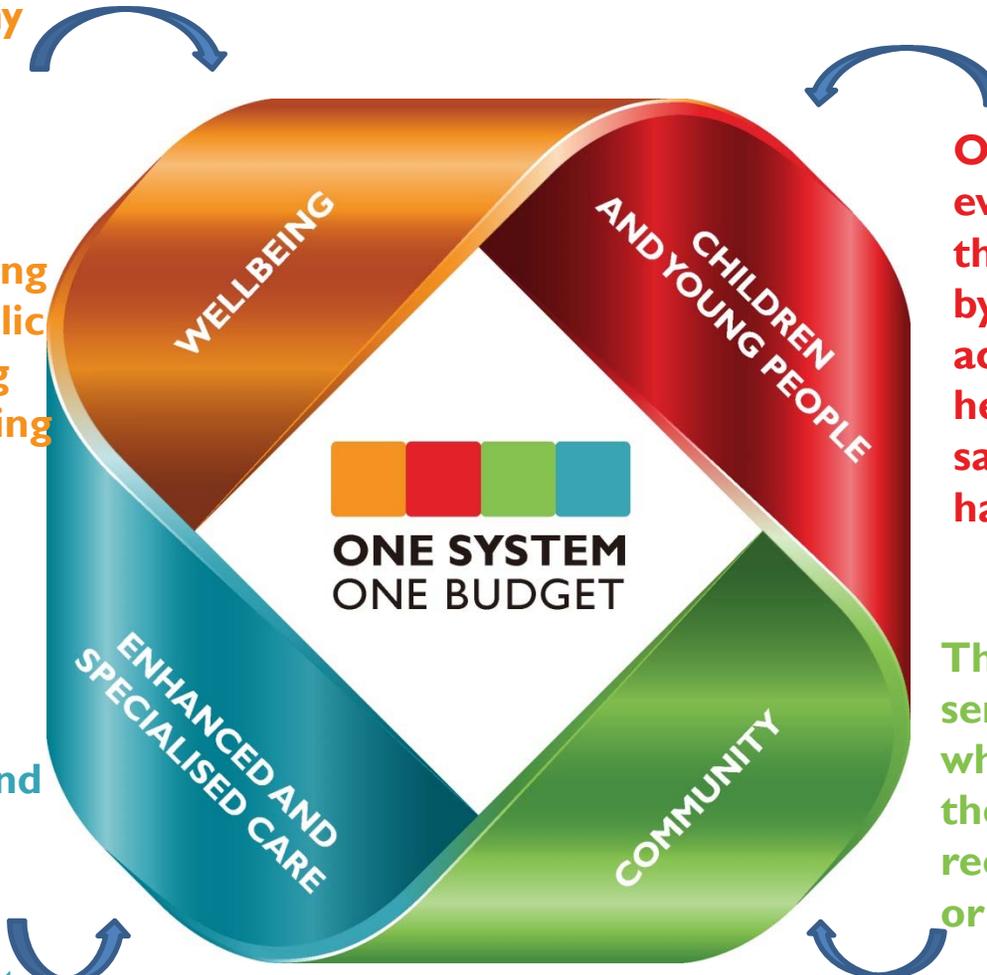

Supporting healthy and happy communities by encouraging and utilising social networks, increasing investment in public health and putting health and wellbeing at the heart of everything we do.

A system that consists of quality specialist health and care services that promote choice, independence, dignity and respect.

Our ambition is for every child to have the best start to life by ensuring they can access education, health care and are safeguarded from harm.

This strategy targets services for people who need support in the short term to recover from a crisis or short term need.
