TIPS FOR INCLUDING PCP IN SHARED CARE CONFERENCE

Primary and Specialty Care Providers may lack experience in Shared Care Planning. It is important to provide information ahead of time about the following when asking them to participate in Shared Care Conferences:

1. The purpose of the Shared Care Conference
2. The specific questions the team has for them, or the kind of information the team would like them to provide.
3. The amount of time they will need to schedule for the meeting.
4. The role of the LCC
5. How information about this patient will be shared and how the team will communicate as patient needs change or issues arise.
6. Some teams find it useful to convene the shared care conference at the PCP's office immediately before or after a planned appointment with the PCP.
