

Spoke Regional Profile

Period: Jan 2015 - Dec 2015 Profile Type: Adults (18–64 Years)

Welcome to the 2015 Blueprint Spoke
Regional Profile of the Vermont
Hub & Spoke Program, which provides
Medication Assisted Treatment (MAT) to
Vermonters with opioid use disorder
(OUD). The Blueprint for Health, in
partnership with the Vermont Department
of Health Division of Alcohol and Drug
Abuse Programs, offers this statewide view
of the program.

The Hub & Spoke Program is a systematic treatment response to the opioid epidemic in Vermont. This program enhances the provision of MAT by adding new health care staff to both Hub designated providers and the Spokes to provide Health Home (HH) services. These new staff link OUD treatment with Blueprint primary care practices and community health teams to provide care that is evidence based and integrated.

The Spoke Regional Profiles provide comparative measurement to inform quality improvement at local and statewide levels. Spokes are organized through the Blueprint for Health's statewide network of Patient-Centered Medical Homes and Community Health Teams.

As part of the Blueprint, the Spoke Regional Profiles provide comparative measurement to inform quality improvement at local and statewide levels.

Blueprint Spoke Regional Profiles are based on data from Vermont's all-payer claims database (VHCURES) and the Vermont Clinical Registry. The population in this profile is Medicaid beneficiaries 18-64 years with OUD who received treatment in a Spoke in 2015. Spoke practices have been combined to the Blueprint Hospital Service Area level.

The measure results in the profile have not been risk adjusted unless specifically noted.
Cells with fewer than eleven members are not reported consistent with Medicare guidelines.

Demographics & Health Status

	Spoke	Non-MAT Opioid Addicted	Medicaid Statewide
Average Members	2,600	1,379	72,874
Average Age	33.2	35.5	38.1
% Female	53.5	49.3	56.7
% Maternity	8.4	3.2	3.6
% with Selected Chronic Conditions	51.5	59.2	35.2
% CRG Significant Chronic	46.1	47.3	21.8
% Depression	37.6	43.9	16.9
% Hepatitis C	13.2	12.0	2.3
% ADD	17.6	15.3	5.5
% Asthma	18.4	20.2	12.0
% Mental Health (Non-Substance Use)	75.2	81.4	40.7
% Other Substance Use	62.7	66.3	12.5
% Tobacco Dependence	63.9	64.3	23.1

Table 1: This table provides comparative information on the demographics and health status of all Medicaid members of the Spoke program. For comparison, it also includes demographic and health status information for Medicaid beneficiaries with OUD who did not receive treatment in either a Hub or Spoke in 2015. For context, the table also provides for the general Medicaid population statewide.

Average Members serves as this table's denominator and adjusts for partial lengths of Medicaid enrollment during the year. Average membership is calculated as the proportion of the measurement year that an individual is covered by Medicaid. Denominator populations vary across the three MAT profiles due to differences in attribution (please see the attribution section of related methods documentation).*

The Selected Chronic Conditions measure indicates the proportion of members identified through the claims data as having one or more of seven selected chronic conditions: asthma, chronic obstructive pulmonary disease, congestive heart failure, coronary heart disease, hypertension, diabetes, and depression. Additional chronic conditions were included as separate lines in this table because they were prominent in this cohort.

The Health Status (CRG) measure aggregates 3M™ Clinical Risk Grouper (CRG) classifications for the year for the purpose of generating adjusted rates. Aggregated risk classification groups include: Healthy, Acute (e.g., ear, nose, throat infection) or Minor Chronic (e.g., minor chronic joint pain), Moderate Chronic (e.g., diabetes), Significant Chronic (e.g., diabetes and congestive heart failure), and Cancer (e.g., breast cancer, colorectal cancer) or Catastrophic (e.g., HIV, muscular dystrophy, cystic fibrosis). Since most members fall into the chronic category with a detail CRG indicating OUD, we distinguish the less healthy population as having a CRG aggregate category of significant chronic or higher.

^{*}This profile is intended to be read with the related methods documentation.

Spoke Regional Profile

Period: Jan 2015 - Dec 2015 Profile Type: Adults (18-64 Years)

Total Expenditures per Capita

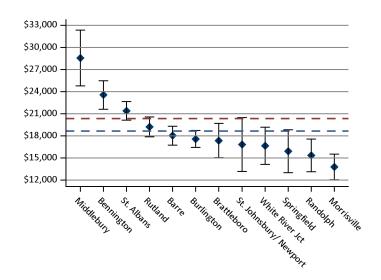

Figure 1: Presents annual crude rates, including 95% confidence intervals, with expenditures capped statewide for outlier patients. Expenditures include all health care claims paid by Medicaid. The blue dashed line indicates the Spoke statewide average. The red line indicates the Spoke statewide average plus non-claims expenditures for Spoke staff per capita (see Figure 2).

Total Spoke Staff Expenditures

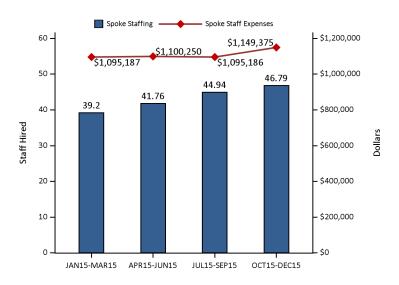

Figure 2: Presents trends for Spoke staffing expenditures and spoke staffing counts for each quarter within the measurement year.

Total MAT & Non-MAT Expenditures

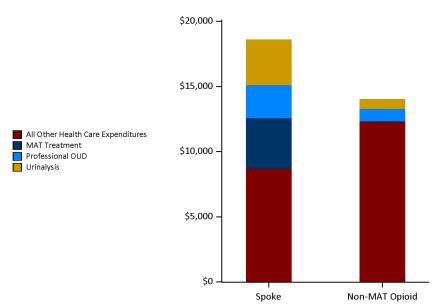

Figure 3: Presents annual crude rates for Medication Assisted Treatment (MAT) expenditures, Non-MAT expenditures, Professional Opioid Use Disorder (OUD) expenditures, and Urinalysis expenditures with expenditures capped statewide for outlier patients.

Spoke Regional Profile

Period: Jan 2015 - Dec 2015 Profile Type: Adults (18-64 Years)

Total MAT Expenditures per Capita by Treatment Category

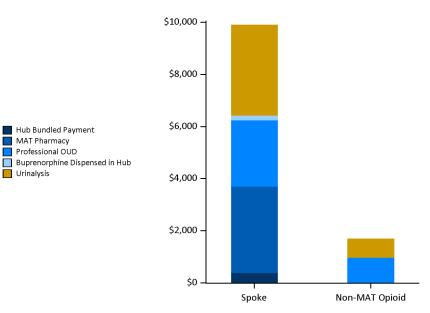

Figure 4: Presents annual crude rates for the major components of Medication Assisted Treatment (MAT) expenditures as well as Urinalysis expenditures with expenditures capped statewide for outlier patients.

All Other Health Care Expenditures per Capita by Major Category

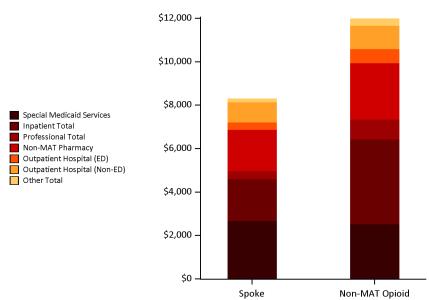

Figure 5: Presents annual crude rates for the major expenditure categories for health and OUD care with expenditures capped statewide for outlier patients. Special Medicaid Services are services that commercial insurance often does not cover (e.g. transportation, special school services, residential treatment, etc.) and are reported separately.

Spoke Regional Profile

Period: Jan 2015 - Dec 2015 Profile Type: Adults (18-64 Years)

Inpatient Discharges*

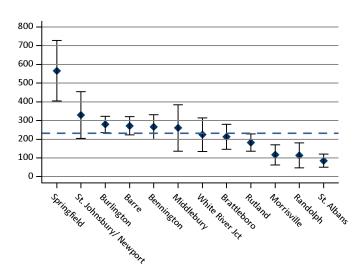

Figure 6: Presents annual crude rates, including 95% confidence intervals, of inpatient discharges per 1,000 members. The blue dashed line indicates the statewide Spoke average.

Outpatient ED Visits*

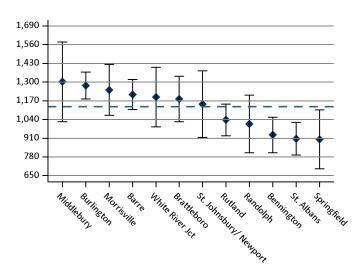

Figure 7: Presents annual crude rates, including 95% confidence intervals, of outpatient emergency department (ED) visits per 1,000 members. The blue dashed line indicates the statewide Spoke average.

Advanced Imaging (MRIs, CT Scans)

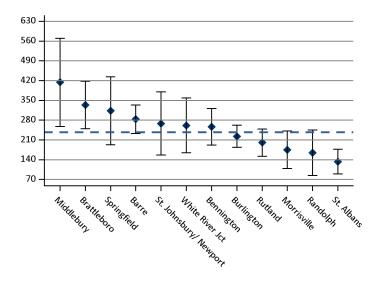

Figure 8: Presents annual crude rates, including 95% confidence intervals, of advanced imaging diagnostic tests (i.e., magnetic resonance imagings (MRIs) and computed tomography (CT) scans) per 1,000 members. The blue dashed line indicates the statewide Spoke average.

*These measures are included in the Center for Medicare & Medicaid Services Health Home reporting.

Spoke Regional Profile

Period: Jan 2015 - Dec 2015 Profile Type: Adults (18-64 Years)

Risk-Adjusted Inpatient Discharges

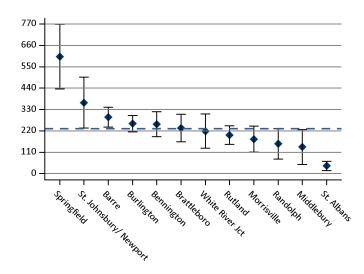

Figure 9: Presents annual risk-adjusted rates, including 95% confidence intervals, of inpatient discharges per 1,000 members. The blue dashed line indicates the Spoke statewide average.

Risk-Adjusted Outpatient ED Visits

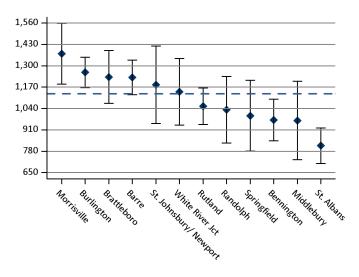

Figure 10: Presents annual risk-adjusted rates, including 95% confidence intervals, of outpatient emergency department (ED) visits per 1,000 members. The blue dashed line indicates the Spoke statewide average.

Risk-Adjusted Total Expenditures per Capita

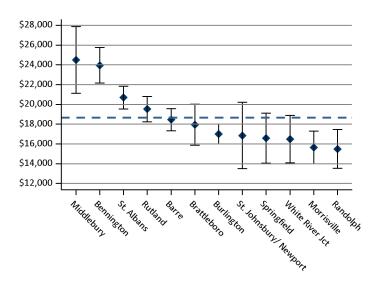

Figure 11: Presents annual risk-adjusted rates, including 95% confidence intervals, with expenditures capped statewide for outlier patients. Expenditures include all health care claims paid by Medicaid. The blue dashed line indicates the Spoke statewide average.

Spoke Regional Profile

Period: Jan 2015 - Dec 2015 Profile Type: Adults (18-64 Years)

Adult Body Mass Index Assessment*

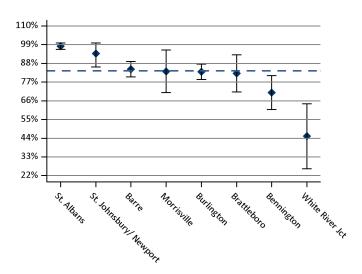

Figure 12: Presents the proportion, including 95% confidence intervals, of continuously enrolled members with an outpatient visit whose body mass index (BMI) was documented during the measurement year or the year prior. This figure includes only practices providing clinical data to the Vermont Clinical Registry. The blue dashed line indicates the Spoke statewide average.

Screening for Clinical Depression*

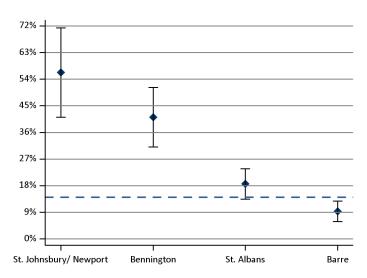

Figure 13: Presents the proportion, including 95% confidence intervals, of continuously enrolled members that were screened for clinical depression on the date of encounter using an age-appropriate standardized depression screening tool. This figure includes only practices providing clinical data to the Vermont Clinical Registry. The blue dashed line indicates the Spoke statewide average.

Controlling High Blood Pressure*

Too few records in clinical registry

Figure 14: Presents the proportion, including 95% confidence intervals, of continuously enrolled members with hypertension that had controlled blood pressure (<140/90 mmHg) during the measurement year. This figure includes only practices providing clinical data to the Vermont Clinical Registry. The blue dashed line indicates the Spoke statewide average.

Tobacco Use Screening*

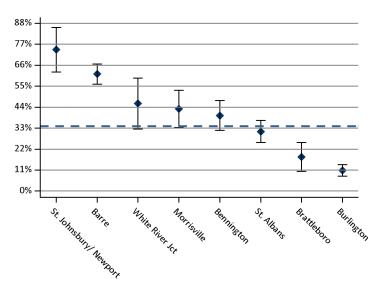

Figure 15: Presents the proportion, including 95% confidence intervals, of continuously enrolled members that were screened for tobacco use one or more times within a two-year lookback period and that received cessation counseling intervention. This figure includes only practices providing clinical data to the Vermont Clinical Registry. The blue dashed line indicates the Spoke statewide average.

Effective / Preventive

^{*}These measures are included in the Center for Medicare & Medicaid Services Health Home reporting

Spoke Regional Profile

Period: Jan 2015 - Dec 2015 Profile Type: Adults (18-64 Years)

Breast Cancer Screening*

Too few women served in this age range

Cervical Cancer Screening*

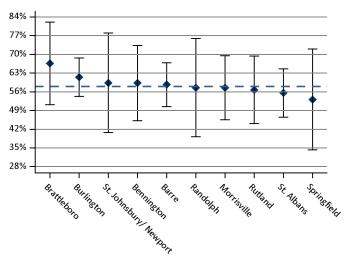

Figure 16: Presents the proportion, including 95% confidence intervals, of continuously enrolled female members, ages 52–64 years, who had a mammogram to screen for breast cancer during the measurement year or year prior to the measurement year. The blue dashed line indicates the Spoke statewide average.

Figure 17: Presents the proportion, including 95% confidence intervals, of continuously enrolled female members either (a) ages 21–64 years who received one or more Papanicolaou (Pap) tests to screen for cervical cancer during the measurement year or two years prior to the measurement year or (b) ages 30–64 years who received one or more Pap tests to screen for cervical cancer during the measurement year or four years prior to the measurement year. The blue dashed line indicates the Spoke statewide average.

Follow-Up After Hospitalization for Mental Illness*

Too few index events

Figure 18: Presents the proportion, including 95% confidence intervals, of continuously enrolled members, ages 18 years and older, hospitalized for mental illness with an intensive outpatient encounter or partial hospitalization with a mental health practitioner and a follow-up visit within seven days of discharge. The blue dashed line indicates the Spoke statewide average. Note: If follow-up was provided at a Hub or by Spoke staff, no separate claim would be generated to be counted in this measure.

*These measures are included in the Center for Medicare & Medicaid Services Health Home reporting.

Spoke Regional Profile

Period: Jan 2015 - Dec 2015 Profile Type: Adults (18-64 Years)

The following tables provide greater detail on the annual crude rates presented in the preceding figures.

Spoke Regional Profile

Period: Jan 2015 - Dec 2015 Profile Type: Adults (18-64 Years)

Spoke Case Load Growth

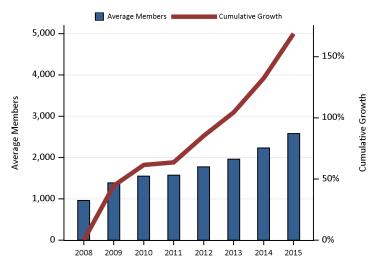

Figure 19: Presents the total average members per year receiving at least one prescription for buprenorphine as identified in the pharmacy claims within the measurement year and the percent cumulative growth since 2008.

Medicaid Enrollment & MAT Treatment

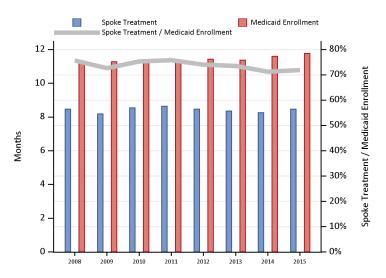

Figure 20: Presents the average number of Medicaid enrollment months among Spoke participants, the average number of Spoke treatment months, and the percent of Medicaid enrollment months that member received treatment. Spoke participation and Medicaid enrollment remained stable from 2008–2015 despite enhancements and changes made to the Spoke program.

Spoke Regional Profile

Period: Jan 2015 - Dec 2015 Profile Type: Adults (18-64 Years)

SFY2016 MAT Rate per 100,000 People

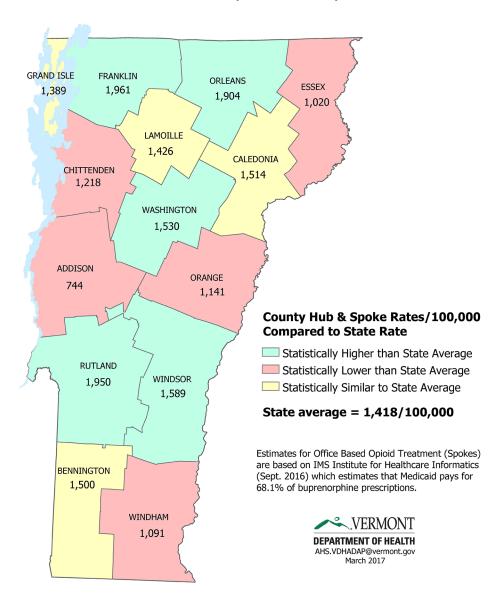

Figure 21: Presents the rate of Hub & Spoke participation per 100,000 people within each county. Shading indicates whether the rate of MAT participation was statistically higher, lower, or similar to the statewide average. This figure is produced by the Vermont Department of Health and is a non-claims measure of statewide access to treatment.
