

Hub & Spoke

Vermont’s Opioid Use Disorder Treatment System

Hub and Spoke is Vermont’s system of Medication Assisted Treatment, supporting people in recovery from opioid use disorder. Nine Regional Hubs offer daily support for patients with complex addictions. In over 75 local Spokes, doctors, nurses, and counselors offer ongoing addiction treatment fully integrated with general healthcare and wellness services. This framework efficiently deploys addictions expertise and helps expand access to opioid user disorder treatment for Vermonters.

Medication Assisted Treatment: The Evidence-Based Approach to Opioid Addiction

Medication Assisted Treatment (MAT) uses medication such as methadone and buprenorphine, as part of a comprehensive opioid use disorder treatment program that includes counseling. Medication Assisted Treatment is not the only treatment for opioid addiction, but it is the most effective treatment for most people. It is supported by the American Medical Association, the American Academy of Addiction Psychiatry, and the American Society of Addiction Medicine. Federal regulations designate two settings where Medication Assisted Treatment can take place, Opioid Treatment Programs (OTPs) and Office Based Opioid Treatment (OBOT) settings. Vermont takes this structure as a starting point, and strengthens and connects the elements.

Hubs Offer Intensive Treatment for Complex Addictions

Hubs are Opioid Treatment Programs, with expanded services and strong connections to area Spokes. There are currently 9 Hubs in Vermont. Each Hub is the source for its area’s most intensive opioid use disorder treatment options, provided by highly experienced staff.

- Hubs offer the treatment intensity and staff expertise that some people require at the beginning of their recovery, at points during their recovery, or all throughout their recovery.
- Hubs provide daily medication and therapeutic support.
- Patients receiving buprenorphine or vivitrol may move back and forth between Hub and Spoke settings over time, as their treatment needs change.
- Hubs offer all elements of Medication Assisted Treatment, including assessment, medication dispensing, individual and group counseling, and more.

- Additional Health Home supports are made available at Hubs through the Hub & Spoke staffing and payment model. These include case management, care coordination, management of transitions of care, family support services, health promotion, and referral to community services.
- In addition to treating their own patients, Hubs offer trainings and consultation to the Spoke providers.

Spokes Provide Ongoing Treatment in Community Settings

Spokes are Office Based Opioid Treatment settings, located in communities across Vermont. At many Spokes, addiction care is integrated into general medical care, like treatment for other chronic diseases.

- The Spokes are mostly primary care or family medicine practices, and include obstetrics and gynecology practices, specialty outpatient addiction programs, and practices specializing in chronic pain.
- Prescribers in Spoke settings are physicians, nurse practitioners, and physician's assistants federally waived to prescribe buprenorphine. They may also provide oral naltrexone or injectable Vivitrol.
- People with less complex needs may begin their treatment at a Spoke, other patients transition to a Spoke after beginning recovery in a Hub.
- Spoke care teams include one nurse and one licensed mental health or addiction counselor per 100 patients. These Spoke staff provide specialized nursing, counseling and care management to support patients in recovery, this staff assures team-based care and helps primary care providers balance MAT patient care with the needs of their full patient panel.

State Oversight, Supplemental Funding, Quality and Measurement Support

- The Hub & Spoke concept was first introduced by John Brooklyn, MD and the model was designed and operationalized by the State of Vermont through the Blueprint for Health, the Department of Vermont Health Access, and the Vermont Department of Health's Division of Alcohol and Drug Abuse Programs.
- The State of Vermont pays for Hub and Spoke services via Medicaid. The Hub programs bill a monthly bundled rate, and the Blueprint distributes funds to support Spoke staffing through its existing Community Health Team payment infrastructure.
- The State of Vermont provides oversight for the program, helping communities monitor treatment needs, waitlist length, average time to treatment, and program performance.
- The Blueprint for Health provides each Vermont community with a data profile showing Hub & Spoke patient demographic data and key program measures, to support data-driven quality improvement.

Evidence of Program Impact

- Access to treatment has grown since program inception, with more than 6000 people now participating.
- The Blueprint for Health uses claims and clinical data to evaluate program impact and program costs. The Blueprint is working with other state agencies to incorporate additional data, such as Corrections data, into its evaluation.
- A peer-reviewed article published in the journal *Substance Abuse Treatment* showed that health care costs for Vermonters in Medication Assisted Treatment were lower than for Vermonters with opioid addiction not in Medication Assisted Treatment, even when including the substantial treatment costs.
