# Ranking System

<b>Ranking Guidelines</b>	<a href="#">What Makes a Good Quality Measure?   Health Care Quality   JAMA   JAMA Network</a>			
		<b>1</b>	<b>2</b>	<b>3</b>
<b>Importance</b>	how important is this to our stakeholders	<i>not</i>	<i>somewhat</i>	<i>very</i>
<b>Scientific Soundness</b>	how sound is it clinically (the process-outcome relationship) and from a measurement perspective (reliability and validity)	<i>not</i>	<i>somewhat</i>	<i>very</i>
<b>Usability</b>	how well will it help participants complete required actions	<i>not</i>	<i>somewhat</i>	<i>very</i>
<b>Feasibility</b>	how realistic is it to capture this data	<i>not</i>	<i>somewhat</i>	<i>very</i>

# Our Work

---

What are your comments/questions/concerns/recommendations for the proposed quantitative component of the pilot evaluation:

Does the measure answer the question and provide stakeholders what they want to know?

Is there anything about how the measure is defined or structured we need to be aware of to ensure reliability and validity of results?

Does this measure help you focus on what needs to get done? (what gets measured gets done)

What limitations might we have missed for collection or reporting (feasibility)?
