

PCMH Screening Snapshot

Blueprint for Health QI Facilitation
Network
July 2022

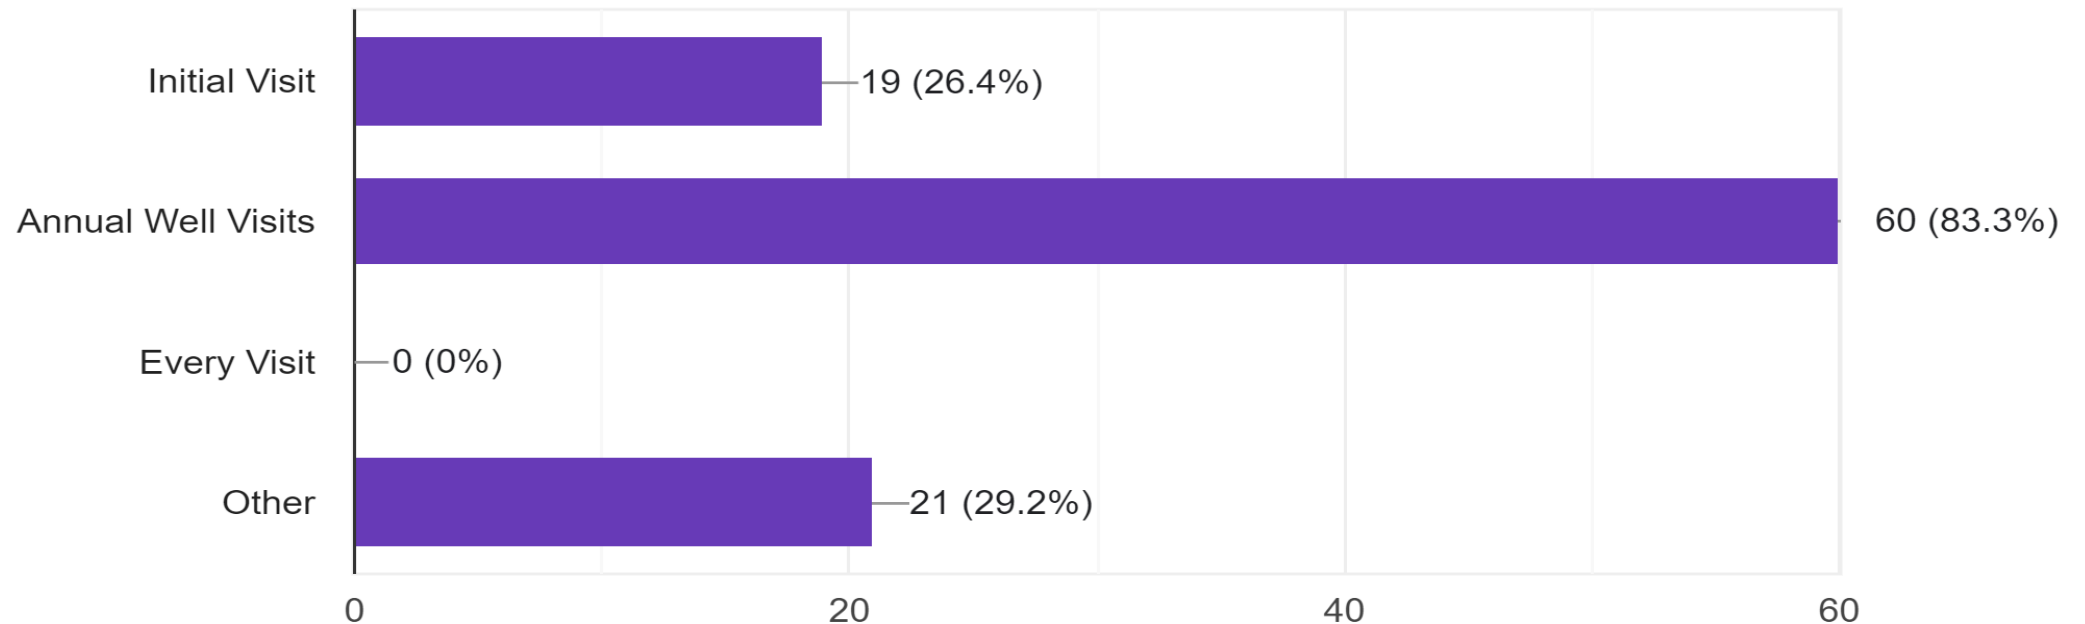

PCMH Screening Field Survey

- 9 questions total
- Conducted early July 2022
- 73 (included) responses
- 47% Hospital Owned, 31% independent, 22% FQHC
- Representation from 11 H.S.As
- 91.5% indicated that universal screening (all practice population) is occurring

Timing of Screening

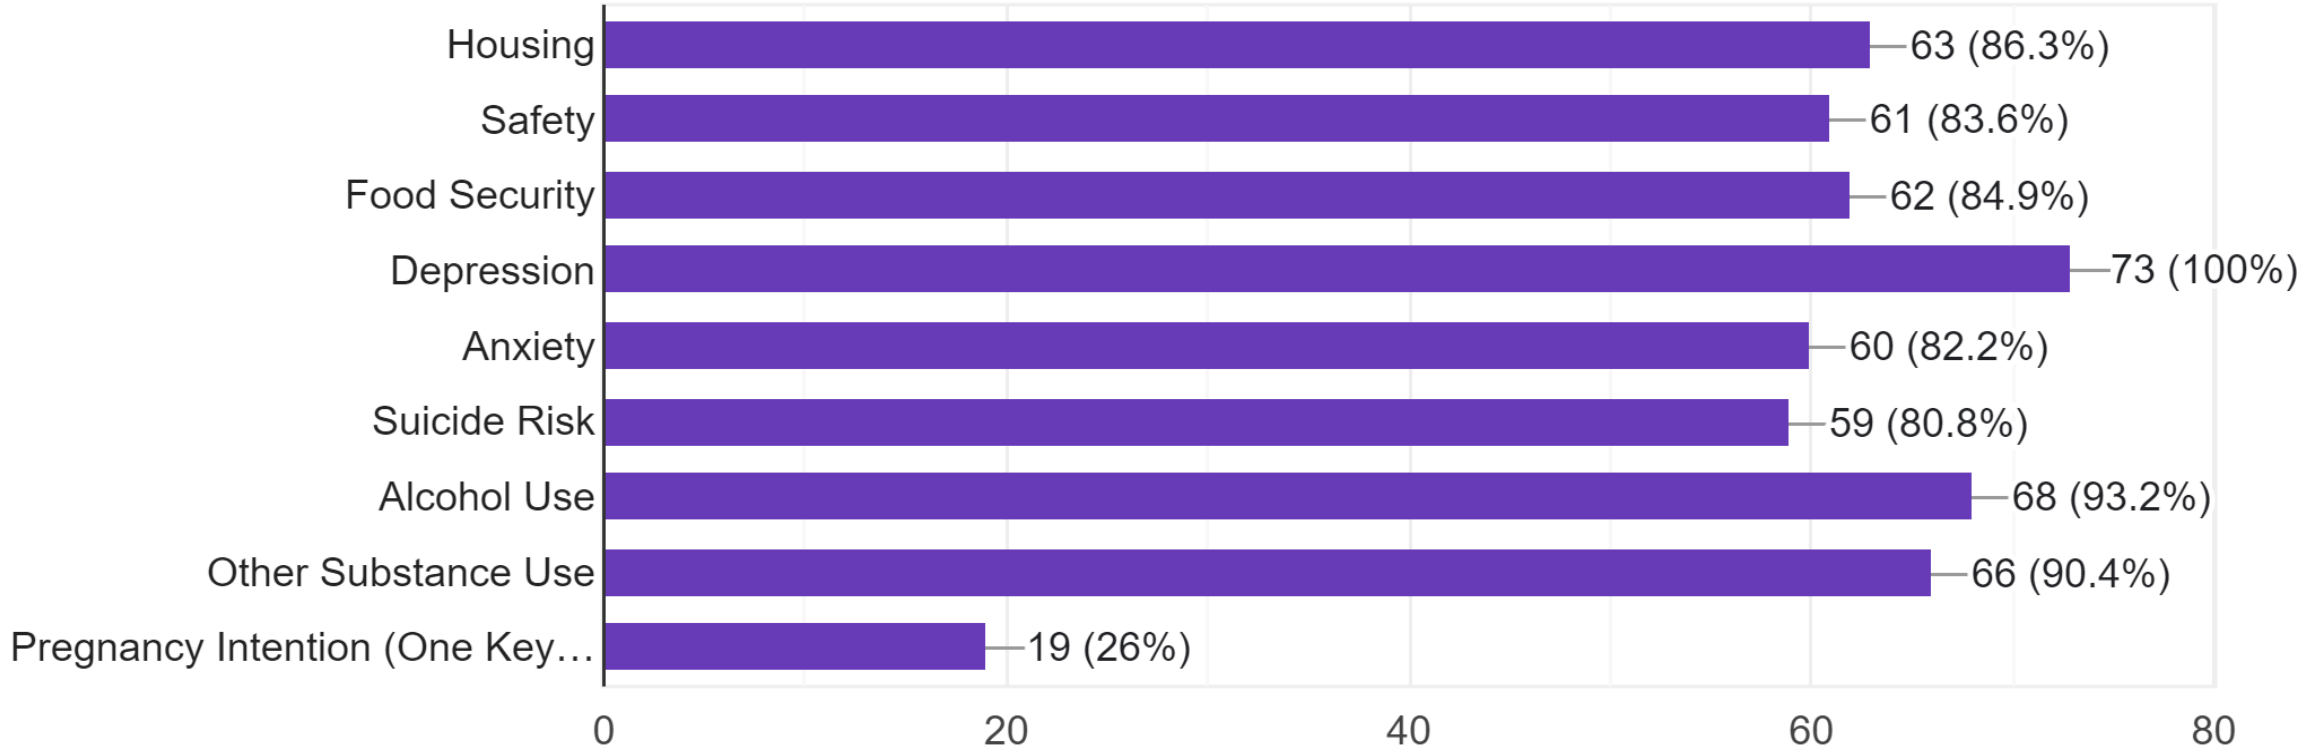

How frequently are patients screened? (Choose all that apply)

72 responses

Which domains are screened? (Choose all that apply)

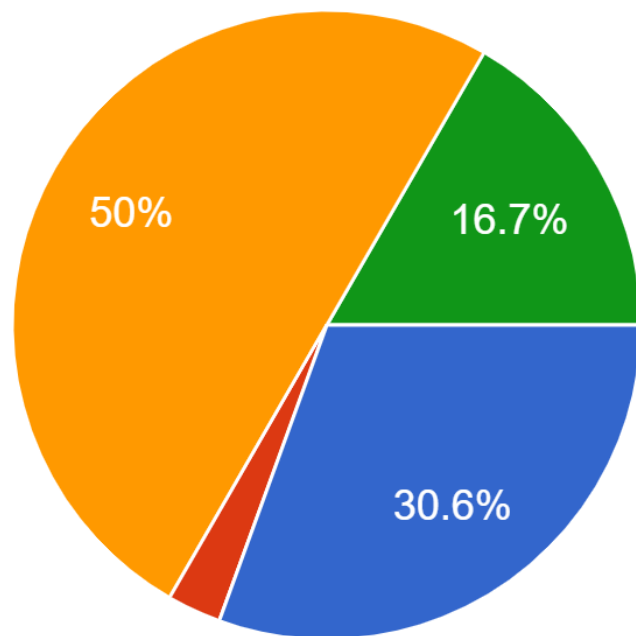

73 responses

**One Key Question is a requirement of WHI participating practices; only a subset of PCMH practices participate*

How are screenings conducted?

72 responses

- Electronically - EHR/Portal
- Electronically - Other Screening Platform
- Paper
- Other

Current Unknowns

- Access
 - Vermonters not associated with a primary care practice
- Screening
 - Which screening tools are typically used
 - Positivity rates
 - Screening practices in other settings (Emergency Departments, Mental Health Agencies, Schools, etc.)
- Brief Intervention
 - Warm-hand off/same day intervention rates
 - Who provided intervention
 - Provision/duration of on-site short term mental health and substance use treatment following positive screen for clinically appropriate cases
 - Provision of care coordination services
- Follow Up
 - Specialty and community referrals made
 - Referral loop closure
